

Position Description

Powering a
Bright Future

Contractor Works Delivery Manager

Contractor Program Delivery

Program Delivery

Objectives

- Responsible for ensuring contractor works are delivered on time, within budget (including variations management), and as per contract deliverables.
- Provide input into the development and implementation for continuous improvement of a centralised management framework for contractor work programs and projects; to meet TasNetworks' operational objectives and business goals,

Role Specific Accountabilities

- Manage a state-wide portfolio of contractor delivered works packages/projects across a diverse range of electrical supply industry disciplines.
- Establish and manage an end to end delivery framework for contractor work packages and projects.
- Manage contractor performance related to on time, on budget (including variations), and quality to achieve best possible commercial outcomes.
- Liaise with and maintain strategic relationships with contractors to plan, review, resolve complex issues, and deliver multiple works programs.
- Communicate, collaborate, and positively influence strong working relationships across multiple internal departments and stakeholders of differing levels.
- Provide technical and specialist advice to support/guide contractors in project specific needs and requirements aligned to TasNetworks' standards, practices, and procedures.
- Utilise and maintain IT systems such as SAP, The Podium, I Auditor, and Microsoft Office to manage contractor works delivery and performance.
- Any other duty or task as reasonably and lawfully directed by TasNetworks.

TasNetworks and **you.**

To be successful in this role

- Demonstrate our core behaviours, which are central to all positions at TasNetworks.
- Have formal qualifications in project/construction management with a trade qualification in overhead linework and/or electrician in an ESI environment.
- Additional qualifications in cable jointing and transmission linework desirable.
- Have considerable, proven experience in the commercial management of large contractor programs of work in an ESI environment, across a diverse range of disciplines.
- Have a proven ability to leverage balanced commercial outcomes through established contracts and procurement policies.
- Comprehensive knowledge in all aspects of design, construction, maintenance, and operation of distribution and transmission networks.
- Have excellent verbal, written, and communication skills and an ability to influence strong outcomes with internal and external stakeholders.
- Able to demonstrate the capacity to perform the inherent requirements of the role.
