Bright Future

## Work Inspector – Civil & Vegetation

Construction

Northwest Transmission Development

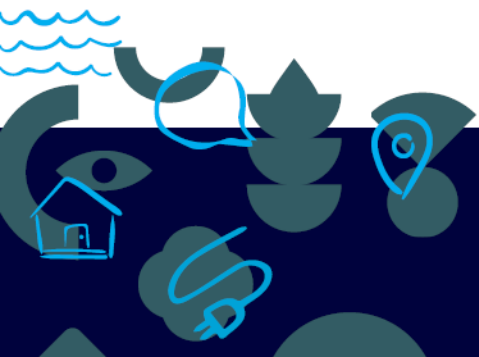

|                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|--------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Objectives                     | <ul style="list-style-type: none"><li>• Responsible for field-based oversight, quality assurance, and safe delivery of Civils and Vegetation construction activities across the network.</li><li>• Collaborate with the Tas Networks Transmission and Distribution teams to ensure civil and vegetation works are compliant to the existing system and design standards</li><li>• Ensure contractors meet technical standards, safety requirements, and project milestones while maintaining reliable service to customers.</li><li>• Influence outcomes with Contractor where appropriate and escalate up as required. Be the first point of escalation and work towards early resolution.</li><li>• Influence completion of all jobs on time, at estimated cost, and to the agreed standard, this role is the sign-off of the payment structure</li><li>• Ensuring contractor is not delayed inadvertently by any TN controllable activities, but also issue works delays as required</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Role Specific Accountabilities | <ul style="list-style-type: none"><li>• Work under limited supervision to conduct inspections civil and associated vegetation control works to verify compliance with project specifications.</li><li>• Work as part of a self-directed team to monitor contractor performance and workmanship, identifying non-conformances and escalating for corrective actions.</li><li>• Perform routine inspections, and verification checks on overhead transmission and distribution civils and vegetation assets and providing appropriate reporting outcomes.</li><li>• Issue site directives to the contractor under the delegation framework, keeping the program on track during potential changes to scope events</li><li>• Responsible for site confirmation of completion of works, Validating the payment claim via the project measure and capture process</li><li>• Continued auditing and record keeping responsibility through the routine inspections, complete field assessments as required</li><li>• Ensure compliance to safety, environmental and service delivery standards</li><li>• Ensure all works comply with safety legislation, environmental obligations, and organisational service delivery standards.</li><li>• Participate in incident investigations and contribute to risk assessments and safe work method reviews.</li><li>• Liaise with contractors, project engineers, and site supervisors to support timely delivery of project milestones.</li><li>• Participate in response and network reliability requirements.</li><li>• Any other duty or task as reasonably and lawfully directed by TasNetworks.</li></ul> |

TasNetworks and **you.**

## To be successful in this role

- Cert III in Civil Construction or equivalent.
- Cert II in ESI – Powerline Vegetation Control, or relevant industry-based experience or accreditation
- Ability to work across remote or dispersed project sites.
- Extensive experience (10 years +) as a linesperson with specific experience in Construction, ideally with asset-based experience.
- Proficiency in using project management software, inspection tracking tools, and reporting applications
- Experience in with relevant engineering codes, zoning ordinances, and workplace safety legislation.
- Competency in using surveying instruments (like total stations or laser levels) and specialized metering devices.
- Ability to write and or review technical documentation, Understand Civils Drawings and tables. Ability to understand contractual objectives and apply them in a field-based environment, leveraging experience and industry knowledge to gain the best outcomes for TasNetworks
- Ability to use their practical experience to outline gaps in works completed and ensure re-work is completed appropriately in line with the contract to allow for Payment Structure sign off
- Ability to work independently and as part of a team
- Ability to notice minor deviations from design specifications or substandard workmanship before they cause failures.
- Able to demonstrate the capacity to perform the inherent requirements of the role

Our behaviours **be curious** **be brave** own it

## Compliance Requirements

- A satisfactory National Police Record check to confirm eligibility for the role
- A 'critical worker' suitability assessment for the purposes of the *Security of Critical Infrastructure Act 2018* (Cth) (or any successor to that Act) and the *Security of Critical Infrastructure (Critical Infrastructure Risk Management Program) Rules 2023* (Cth) (or any successor to those Rules), comprised of:
  - a National Security Assessment by ASIO;
  - a Criminal History Check by ACIC; and
  - a Right to Work in Australia check;
- A valid Australian Driver's License
