Position Description

TasNetworks | Powering a Bright Future

Project Manager

Operations | Connection Projects

Objectives	• Lead the delivery of electricity network infrastructure projects to achieve safe, efficient and effective project outcomes. • Be accountable for project scope, cost, schedule, resources, risk, quality and delivery performance within approved parameters and delegated authority. • Provide specialist project management input throughout project development and delivery to support effective planning and informed delivery decisions. • Build positive working relationships with internal and external parties to enable coordinated delivery and achieve customer and organisational outcomes.
Role Specific Accountabilities	• Lead projects from contract execution through delivery and close-out, coordinating scope, schedule, cost, resources, quality and project requirements to achieve agreed outcomes. • Provide project management input during project development, including delivery methodology, constructability, resource requirements, delivery costs, risks, assumptions and constraints. • Establish and maintain appropriate project controls across scope, schedule, risk, resources and performance, using these to monitor project performance, inform decisions and take action to address emerging delivery pressures. • Coordinate internal resources, contractors, consultants and service providers, applying sound project management judgement to resolve delivery issues and achieve safe, efficient and effective project outcomes. • Take accountability for the cost-to-deliver, including monitoring expenditure and commitments, maintaining forecasts and assessing the delivery impacts of project changes. • Build effective working relationships across relevant technical, operational, commercial and support functions to coordinate project delivery and align customer and contractual requirements with delivery outcomes. • Ensure projects are delivered in accordance with approved scope, applicable legislation, contractual requirements & TasNetworks policies, procedures and standards, with appropriate project governance, documentation and close-out. • Contribute to continuous improvement of project management processes, systems, controls and delivery practices, including capturing and applying lessons learned. • Any other duty or task as reasonably and lawfully directed by TasNetworks.

To be successful in this role	• Demonstrate our core behaviours, which are central to all positions at TasNetworks. • Tertiary qualification in Project Management, Engineering, Construction Management or a related discipline, or equivalent professional experience, with an electrical trade background highly regarded. • Demonstrated project management experience within utilities, infrastructure, construction or a similar environment, including delivery across the project lifecycle. • Demonstrated knowledge and practical experience in project planning and controls, including scope, schedule, cost, forecasting, risk, resources and performance reporting. • Sound commercial and contractual knowledge, with demonstrated ability to assess project changes and their potential cost, schedule, risk and delivery impacts. • Strong analytical and problem-solving skills, with the ability to assess complex information, exercise sound judgement and make timely decisions within delegated authority. • Strong communication and interpersonal skills, with demonstrated ability to build positive relationships, influence outcomes and coordinate internal and external parties with differing requirements. • Demonstrated ability to achieve results in a changing delivery environment while maintaining focus on safety, quality, cost, schedule and customer outcomes. • Demonstrated commitment to continuous improvement and improving project delivery practices.

Compliance Requirements	• A satisfactory National Police Record check to confirm eligibility for the role.
	• A 'critical worker' suitability assessment for the purposes of the *Security of Critical Infrastructure Act 2018* (Cth) (or any successor to that Act) and the *Security of Critical Infrastructure (Critical Infrastructure Risk Management Program) Rules 2023* (Cth) (or any successor to those Rules), comprised of:
	  ○ a National Security Assessment by ASIO;
	  ○ a Criminal History Check by ACIC; and
	  ○ a Right to Work in Australia check.
	• Current driver's license and ability to work across different project locations statewide.
