Position Description

TasNetworks | Powering a Bright Future

Senior Project Manager

Project Management | Network Projects (Large Customer Projects)

Objectives	• Provide leadership, governance and management for the successful delivery of complex large customer infrastructure projects and programs across their full lifecycle, ensuring achievement of customer, commercial, operational and regulatory outcomes. • Accountable for delivery of project objectives within approved scope, schedule, risk and budget parameters, managing trade-offs and project performance to optimise commercial, customer and operational outcomes. • Provide commercial leadership, contract administration, negotiation and governance across project contracts, ensuring effective management of project risk and protection of TasNetworks commercial interests. • Lead strategic engagement and influence across customers, internal stakeholders, contractors, suppliers, regulators, landholders and communities to secure project outcomes and maintain strong stakeholder relationships. • Manage multiple concurrent projects and programs typically ranging from $10M to $100M+, exercising significant professional judgement and autonomy within delegated authority frameworks. • Lead project governance, reporting and assurance activities including business case development, gate reviews, executive reporting and investment governance requirements.
Role Specific Accountabilities	• Accountable for identifying, assessing and managing strategic, commercial, financial, environmental, safety and delivery risks throughout the project lifecycle. • Lead all project lifecycle activities from concept development, business case preparation, scoping, design, procurement, construction and commissioning through to project close-out and asset handover. • Accountable for project financial performance, including development and management of project budgets, forecasting, cashflow management, contingency administration, cost control and variance reporting. • Ensure expenditure remains within approved funding authorities and governance limits. • Lead project procurement activities including procurement strategy development, tendering, contractor selection, commercial evaluation and contract award recommendations. • Exercise delegated authority as Principal's Representative and/or Contract Administrator, including management

	of contract performance, claims, variations, commercial negotiations, disputes and contractor obligations. • Lead project governance activities including stage-gate reviews, investment approvals and executive reporting. • Prepare and present project performance reports, recommendations and critical decisions to senior leadership and governance forums. • Lead multidisciplinary project teams and mentor project personnel. • Ensure compliance with regulatory obligations, National Electricity Rules, safety legislation and organisational standards. • Independently manages assigned projects within approved governance frameworks and delegated authorities. • Makes project delivery decisions necessary to achieve approved outcomes. • Administers project contracts and recommends contract awards, variations and settlements. • Approves expenditure in accordance with delegated financial authority limits. • Escalates matters outside delegated authority to executive management. • Any other duty or task as reasonably and lawfully directed by TasNetworks
To be successful in this role	• Demonstrate our Core Behaviours, which are central to all positions at TasNetworks. • Tertiary qualifications in Project Management, Construction Management, Engineering, Commerce or related discipline. • Demonstrated experience managing complex infrastructure projects and programs valued from $10M to $100M+. • Strong commercial acumen and financial management capability. • Advanced contract administration and negotiation skills. • Strong governance, assurance and reporting capability. • Ability to lead multidisciplinary project teams without direct authority. • Project Management Professional (PMP), AIPM CPPD or equivalent certification (desirable). • Knowledge of the National Electricity Rules and regulated network infrastructure delivery (desirable). • Experience in electrical, high voltage or utilities sectors (desirable).

Compliance Requirements	• A ‘critical worker’ suitability assessment for the purposes of the Security of Critical Infrastructure Act 2018 (Cth) (or any successor to that Act) and the Security of Critical Infrastructure (Critical Infrastructure Risk Management Program) Rules 2023 (Cth) (or any successor to those Rules), comprised of:
	  • a National Security Assessment by ASIO;
	  • a Criminal History Check by ACIC; and

- a Right to Work in Australia check;
- A Satisfactory National Police Record to check to confirm eligibility for the role.
- A current driver's license and the ability to work across different project locations statewide.
